**The Electrochemical Society** 

electrochemical energy **ummit** 2015 Summit Dates: October 12-13, 2015

# Solar Critical Issues and Renewable Energy

228<sup>th</sup> ECS Meeting • PHOENIX, AZ • October 11-16, 2015

## **SAVE THE DATE!**

With population growth and industrialization, global energy needs continue to grow as well. Economic, political, and environmental issues are largely dictated by energy needs. The fifth international ECS Electrochemical Energy Summit (E2S) is designed to foster an exchange between leading policy makers and energy experts about society needs and technological energy solutions.

#### ORGANIZERS

- Daniel Scherson, Case Western Reserve University
- Adam Weber, Lawrence Berkeley National Laboratory
- Krishnan Rajeshwar, University of Texas, Arlington

#### PARTICIPANTS

- Fluid Interface Reactions, Structures, and Transport Center (FIRST)
- David Wesolowski, Oak Ridge National Laboratory
- NorthEast Center for Chemical Energy Storage (NECCES) M. Stanley Whittingham, Binghamton University
- Center for Mesoscale Transport Properties (m2m) Esther Takeuchi, *Stony Brook University*
- Nanostructures for Electrical Energy Storage (NEES) Gary Rubloff, University of Maryland

- Center for Electrochemical Energy Science (CEES) Paul Fenter, Argonne National Laboratory
- Joint Center for Energy Storage Research (JCESR) George Crabtree, Director
- Joint Center for Artificial Photosynthesis (JCAP) Harry Atwater, Director
- Potential participation of large-scale government-funded efforts outside the U.S.
