

CONTENTS

Cation Transport in Inorganic Solids

Solid State Ionics of Manganese and Vanadium Oxides <i>M. S. Whittingham</i>	1
Electrochemically Induced Antiphase and Ferroelastic Domain Formation in Lithium Manganese Oxide Cathodes for Rechargeable Batteries <i>Y. M. Chiang, H. Wang, and Y. I. Jang</i>	10
The Kinetics of Thermal Interconversion of Sodium Beta ^γ -Alumina With Sodium Beta Alumina or Alpha Alumina At Temperatures Below 1600K In Gaseous And Liquid Sodium <i>R. M. Williams, M.A. Ryan, M.L. Homer, L. Lara, K. Manatt, V. Shields, R. H. Cortez, and J. Kulleck</i>	18
Minority Carriers and Electrochemical Processes in the Solid Electrolyte RbCu ₄ Cl ₃ I ₂ <i>G.I. Ostapenko and L. G. Veselova</i>	27
Novel NASICON-Polymer Composite Membrane for Electrically Driven Processes: Effect of Ceramic Thickness on Current Efficiency <i>L. M. Cormier, F. Ma, S. T. Bah, S. Guetre, M. Meunier, M. Paleologou, and A. Yelon</i>	35

Anion Transport in Inorganic Solids

Order-Disorder Transformation in Stabilized Bismuth Oxides and its Effect on Ionic Conductivity <i>E. D. Wachsman, S. Boyapati, M. Kaufman, and N. Jiang</i>	42
Gadolinia Doped Ceria and Composites for Fuel Cell Applications <i>B. Zhu, G. Y. Meng, I. Albinsson, and B.E. Mellander</i>	52

Mixed Ionic Electronic Conductors

Mixed-Conducting Dense Ceramics for Gas Separation Applications <i>U. Balachandran, B. Ma, P.S. Maiya, J. T. Dusek, J.J. Picciolo, S.E. Dorris, and M. Liu</i>	61
Effects of B-Site Substituents on Oxygen Permeability and Phase Transformation of Sr _{0.9} Ca _{0.1} Co _{1-x} B _x O _{2+δ} System <i>H. Kusaba, G. Sakai, N. Miura and N. Yamazoe</i>	76
Synthesis and Characterization of Acceptor Doped Samarium Iron Cobaltite <i>K. Hasinska, E. D. Wachsman, J. W. Stevenson, and T. R. Armstrong</i>	83

Oxygen Permeation In Co-Containing Perovskites: Surface Oxygen Exchange vs Bulk Oxygen Diffusion <i>K. Huang, M. Schroeder, and J. B. Goodenough</i>	95
Development of Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas <i>T. L. Clites and E. D. Wachsman</i>	110
Oxygen Permeation Through Mixed Conducting Oxides-Degradation at Low Oxygen Partial Pressures <i>M. Schroeder, K. Huang, H. Q. Yin, and J. B. Goodenough</i>	121
Application of Mixed Conductive La-Sr-Co-Fe Perovskites to NO _x Removal Membrane Reactors <i>Y. Teraoka, Y. Matsumura, K. Asakura, and S. Kagawa</i>	131
Ferrite-Based MIEC Membranes for Oxygen Separation and Methane Conversion <i>X. Lu and M. Liu</i>	139
Mixed Conducting Barium Cerate Membranes for Hydrogen Separation <i>J. M. Rhodes and E. D. Wachsman</i>	151

Modeling of Solid-State Transport

The Spatial Distribution and Transport of Defects in Mixed Ionic-Electronic Conductors: A Rigorous Model <i>K. Duncan & E. D. Wachsman</i>	159
Oxygen Permeation Studies of Short-Circuited Ytria-Stabilized-Zirconia Membranes <i>A. Pham, T. Lee, and R. Glass</i>	172
Application of the Mixed Potential Theory to the Oxygen Permeation Process Through Dense Ceramic Membranes <i>A. Pham, T. Lee, and R. Glass</i>	181

Synthesis and Fabrication

Nanocrystalline Oxide Thin Films for Electrochemical Devices <i>I. Kosacki, T. Suzuki, and H. Anderson</i>	190
Nanostructured Materials for Electrochemical Systems <i>S. L. Swartz, M. M. Seabaugh, and W. J. Dawson</i>	199

Conductivity of Ytria-Doped Ceria Electrolyte Made by Chemical Coprecipitation and its Evaluation for SOFC Application
Y. Gu, X. Liu, G. Li, B. Zhu, G. Meng, and D. Peng..... 211

Electrical Properties of Annealed $\text{La}_{0.5}\text{Sr}_{0.5}\text{MnO}_{3-d}$ Thin Films Prepared by Pulsed Laser Deposition
E. Quenneville, P. Decorse, M. Meunier, F. Morin, and A. Yelon 218

Diffusion of Foreign Cations in Stabilized Zirconia
M. Kilo, G. Borchardt, R.A. de Souza, E. Ivers-Tiffée, S. Weber, and S. Scherrer..... 228

Solid-State Batteries and Fuel Cells

Development and Performance of a Rechargeable Thin Film Solid State Microbattery
S. D. Jones, J. R. Akridge, and R. L. Middaugh..... 238

Intermediate Temperature Solid Oxide Fuel Cells Using LaGaO_3 Electrolyte Doped with Transition Metal Cations
T. Ishihara, T. Shibayama, M. Honda, H. Nishiguchi, and Y. Takita 244

Modeling of the Effect of MEA Microstructure on the Performance of Proton Exchange Membrane Fuel Cells
S. Malhotra, T. Thampan and R. Datta..... 256

Novel Solid-State Devices

Solid-State Devices Based on Thin Film Zirconia Electrolytes
R. Doshi, B. W. Chung, J. Guan, G. R. Lear, K. Montgomery, E. T. Ong, and N. Q. Minh..... 268

Reversible Storage of Nitrogen Oxide by Electrochemical Cell with Na^+ Ion Conductor
H. Koga, K. Sekizawa and K. Eguchi..... 276

Electrochromic Windows; A New Format
P. S. Lugg, S. Bommarito, J. Bailey, K. Budd, P. Cullen, K. Chen, L. C. Hardy, and M. Naehbor..... 284

On the Way from Metal Hydride Films to Solid-State Switchable Mirrors
A.-M. Janner and P. van der Sluis 289

Applications of Programmable Resistance Changes in Metal-Doped Chalcogenides
M. N. Kozicki, M. Yun, L. Hilt and A. Singh..... 298

Solid-State Sensors

Kinetic Aspects of Chemical Sensors Based on Solid State Ionics <i>E. Steudel and W. Weppner</i>	310
Electrochemical SO _x (X = 2 or 3) Gas Sensor Based on Solid Electrolytes <i>G. Meng, P. Yang, and D. Peng</i>	324
Exploration of Auxiliary Phase Materials for High-Sensitivity Solid Electrolyte NO ₂ Sensor <i>N. Yamazoe, K. Shimano, S. Yao, and N. Miura</i>	335
Investigations into the Development of an Alternative Concept of a Potentiometric CO ₂ Sensor <i>H. Näge</i>	342
Novel Compositionally Graded Ferroelectrics for use in Oxygen Sensing <i>S. A. Mansour, M. Brazier, and M. McElfresh</i>	354
A Mixed Potential Sensor Based On A Ce _{0.8} Gd _{0.2} O _{1.9} Electrolyte and Platinum And Gold Electrodes <i>R. Mukundan, E. Brosha, D. R. Brown, and F. H. Garzon</i>	360
Sulfur Resistant Oxygen Sensors for Industrial Boiler Control <i>E. L. Brosha, R. Mukundan, D. R. Brown, F. H. Garzon, and B. Farber</i>	374
Solid State Sensor for Detecting SF ₆ Decomposition Products <i>M. Sakai, M. Yamada, S. Okabe, T. Minagawa, S. Yamauchi, M. Kamei, and C. Nishida</i>	382
Basic Response Principles of Voltammetric Ion-Selective Solvent Polymeric Membrane Sensors <i>E. Bakker and S. Jadhav</i>	390
Pt/NafionR/Pt Electrode Applied to Ammonium Ion Sensor <i>T. C. Chou, K. W. Chiou, H. S. Twu, and T. R. Ling</i>	398
