

## TABLE OF CONTENTS

<b>PREFACE</b>	iii
<b>Reactor Technologies</b>	
An Assessment of 300 mm Wafer Equipment and Process Capability ..... <i>K. Mautz</i>	1
Surface Wave Plasma Driven by Ring Dielectric Line for Large Diameter Wafer Processing ..... <i>T. Nakanishi, M. Taguchi, N. Mitsuhiro, N. Matsumoto, S. Ozaki, K. Komachi, and N. Okumura</i>	13
Magnetically Enhanced Dual Frequency Reactive Ion Etcher for Dielectric Etching ..... <i>S. Wickramanayaka, Y. Miura, Y. Nagakawa, Y. Sago, and Y. Numasawa</i>	18
Study of an Inductively Coupled Plasma Production Mechanism .. <i>K. Takagi, K. Iwatani, and Y. Kuroki</i>	27
Combining Microwave Downstream and RF Plasma Technology for Etch and Clean Applications ..... <i>E. Pavel</i>	34
Charge Exchange in the Sheath and Ion Energy Distribution at RF Electrode ..... <i>N. Mizutani and T. Hayashi</i>	44
RF Peak Voltage Control at the Bias Electrode in the LAM TCP 9400/9600 PTX for Improved Process Stability ..... <i>S. Baldwin, R. Patrick, and N. Williams</i>	55
Bipolar Electrostatic Chucks ..... <i>S. Kanno and T. Usui</i>	64

## Measurement and Diagnostics

Absolute Density and Reaction Kinetics of Fluorine Atoms in Fluorocarbon Plasmas Studied by Vacuum Ultraviolet Absorption Spectroscopy .....	73
<i>K. Sasaki and K. Kadota</i>	
Run-to-Run Evolution of Fluorocarbon Radicals in C <sub>4</sub> F <sub>8</sub> Plasmas Interacting with Hot Inner Wall .....	85
<i>H. Oshio, T. Ichiki, and Y. Horiike</i>	
Rate-Limiting Step of SiO <sub>2</sub> Etching Reaction in Fluorocarbon Plasma Investigated by Electron Spin Resonance and X-Ray Photoelectron Spectroscopy .....	99
<i>M. Okigawa, M. Matsui, T. Tatsumi, and M. Sekine</i>	
Density and Temperature of Metastable Cl <sup>+</sup> Ions in Time-modulated ICP Measured by Time Resolved LIF .....	105
<i>S. Kumagai, M. Sasaki, M. Koyanagi, and K. Hane</i>	
Plasma Charge Monitor of In-Situ Pre-Sputter Etch and Metal Deposition Process in a Sputter System .....	112
<i>X. Zhang, S. Tai, K.-I. Chen, H. Wong, B. Chan, and M. Chang</i>	
Calculation and Measurement of Ion and Electron Shading Parameters and Comparison of Shading Effects with Computer Simulation .....	124
<i>S.C. Siu, V. Vahedi, and R. Patrick</i>	
Development of an Integrated Database for Plasma Processing Technology .....	134
<i>R. Chakraborty</i>	

## Damage and Contamination

Carbon Rich Plasma-Induced Damage in Silicon Nitride Etch ....	146
<i>J.-H. Ye and M.-S. Zhou</i>	
Effect of Plasma Damage on Gate Oxide Grown on Nitrogen Implanted Silicon Substrate for 0.25 um CMOS Technology .....	159
<i>D. Misra and R.K. Jarwal</i>	

The Impact of Silicon Substrate Degradation and Contamination at Sidewall Etch on DRAM Pause Time .....	167
<i>M. Yang, J. Huang</i>	

### **Silicon Etching Processes**

Nano-Scale Plasma Etching for Silicon Technology .....	173
<i>R.A. Gottscho</i>	

Investigation of the Time - Delay Effect on the Critical Dimension of Tungsten Silicide/Polysilicon Gate after Reactive Ion Etching ...	186
<i>S-P. Lin, C-H. Ou, Sz. Lee, Y-C. Tien, and C-F. Hsu</i>	

High Aspect Ratio Silicon Trench Etching for Sub-0.25 um Device Applications .....	193
<i>R. Ranade and G. Mathad</i>	

Deep Trench Etch Process and Equipment Improvements .....	200
<i>P. Kirchhof, V. Grewal, and K. Mautz</i>	

A Polysilicon Plug Recess Etch Process for Sub-Quarter Micron Devices .....	213
<i>G. Kaplita, R. Ranade, and G. Mathad</i>	

Atomic-Order Side-Wall Passivation with Nitrogen in ECR Plasma Etching of Si .....	220
<i>T. Matsuura, T. Seino, and J. Murota</i>	

### **Oxide and Polymer Etching Processes**

Fabrication of Sub-0.1 um Contacts with 193 nm CARL Photo- Lithography by a Combination of ICP Dry Development and M0R1 HDP Oxide Etch .....	226
<i>Y. Song, A. Watson, D. Thomas, K. Powell, H.E. Raske, W.D. Domke and M. Sebald</i>	

Integrated SAC and Liner Etch for 0.15 um Node Technology ....	233
<i>S. Fang, D. Dobuzinsky, and A. Gutmann</i>	

New Borderless Contact Etch with Novel Chamber Condition .....	239
<i>C.-L. Yang, T.Y. Chen, M. Huang, and W. Lur</i>	
Investigation of CH <sub>2</sub> F <sub>2</sub> Chemistry for Self-Aligned Contact Etch ..	246
<i>J. Huang and M. Yang</i>	
Evaluation of Unsaturated Fluorocarbons for Dielectric Etch Applications .....	251
<i>R. Chatterjee, S. Karecki, L. Pruette, and R. Reif</i>	
Effect of Wafer Temperature on Highly Selective Oxide Etch Process Using Freon Based Chemistry .....	263
<i>J. Qiao, S. Thekdi, W.G. Branco, B. Jin, and E.M. Shamble</i>	
Evaluation of O <sub>2</sub> - and N <sub>2</sub> - Addition in Via Etching and CHF <sub>3</sub> /O <sub>2</sub> Post Etch Treatment .....	269
<i>C.N. Ho, G. Higelin, C.H. Low, A. See, L. Chan, and D.H.C. Chua</i>	
Profile Control of Oxide Trench Features for Dual Damascene Applications .....	284
<i>D. Keil, E. Waggener, G. Mueller, and B. Helmer</i>	
Sensitive Endpoint Detection for Dual Damascene Via Etch .....	295
<i>E.A. Hudson and F.C. Dassapa</i>	
Etching Sub-0.25 um Micron Dual Damascene Structures by High Density Plasmas .....	303
<i>N. Chaudhary, A. Cowley, and D. Dobuzinsky</i>	
Development of Damascene Etch Processes for Organic Dielectric Materials .....	308
<i>G. Rajagopalan, A. Taylor, C. Foster, S. Bass, I. Morey, J. Flanner, and S. Ellingboe</i>	
Stability of Advanced Photoresist Systems for Sub-0.25 Micron Lithography during Reactive Ion Etch Processes .....	322
<i>M.D. Naeem, W. Yan, and J. Zhu</i>	

## Metal Etching Processes

A New Copper Dry Etching Process .....	328
<i>Y. Kuo and S. Lee</i>	
Plasma Etching of Aluminum Metallization Layers Using a Tungsten Hard Mask for ULSI .....	336
<i>S.D. Athawale, G. Stojakovic, M. Gutsche, and X.J. Ning</i>	
The Mechanism of Notching Formation between ARC TiN and AlCu Layer During Etching .....	344
<i>W.M. Jo, R.J. Joy, W. Liu, and T.T. Tjoa</i>	
F-Based Plasmas for the Etching of Pt .....	351
<i>Y. Feurprier, Y. Takamura, T. Ichiki, and Y. Horiike</i>	
Precise Chrome Etching in Downstream Chlorine Plasmas with Electron Depletion through Negative Ion Generation .....	361
<i>T. Ichiki, S. Takayanagi, and Y. Horiike</i>	
<b>AUTHOR INDEX</b> .....	371
<b>SUBJECT INDEX</b> .....	375
