

TABLE OF CONTENTS

Part 1: Perspectives of Silicon on Insulator

Abstract No		Page No
383	Advanced SOI Circuits for Microelectronics Market (Invited) F Assaderaghi and G Shahidi (IBM Semiconductor Research and Development Center)	1
384	SOI Microsensors and MEMS (Invited) A Lehto (VTT Electronics)	11
385	3-D Silicon-on-Insulator (SOI) Technologies Using Epitaxial Lateral Overgrowth (ELO) (Invited) G W Neudeck (Purdue University)	25
386	Is There a Future for Cryogenic SOI (Invited) C Claeys and E Simoen (IMEC)	36

Part 2: Materials and Technology

387	Low Energy Oxygen Implantation for Dose Reduction in SIMOX (Invited) M J Anc, B F Cordts, J G Blake (Ibis Technology Corp), and T Nakai (Mitsubishi Materials Silicon Corp)	51
388	Novel SIMOX with BOX at Damage Peak A Ogura (NEC Corporation)	61
389	Fabrication of a Lateral Field Emission Diode Using SIMOX SOI Y-H Bae (Uiduk University), W-J Zang, J-W Lee, S-H Hahm, J-H Lee, and J-H Lee (Kyungpook National University).....	67
390	The Fabrication of a Partial SOI Substrate D M Garner (University of Cambridge), G Ensell, J Bonar, A Blackburn (University of Southampton), F Udrea, H T Lim, A Popescu, W I Milne (University of Cambridge) and P L F Hemment (University of Surrey)	73
391	Recent Progress in Low-Dose SIMOX Wafers Fabricated with Lateral-Thermal Oxidation (ITOX) Process (Invited) A Matsumura, K Kawamura, T Mizutani, S Takayama, I Hamaguchi, and Y Nagatake (Nippon Steel Corporation)	79
392	SMART CUT Technology: Industrial Status of SOI Wafer Production and New Material Developments (Invited) A Auberton-Herve (SOITEC)	93
393	Plasma Immersion Ion Implantation for SOI Fabrication by the Genesis Process I Roth, M Bryan, W Liu, S Qin and C Chan (Silicon Genesis Corporation)	107
394	ELTRAN Epitaxial Layer Transfer (Invited) T Yonehara, K Sakaguchi and N Sato (Canon Inc)	111

395	ELTRAN by Splitting Porous Si Layers K Sakaguchi, Y Yanagita, H Kurisu, H Suzuki, K Ohmi, and T Yonehara (Canon, Inc)	117
396	High Quality SOI Structures By The Genesis Process S Farrens, W G En, I Malik, M Bryan, I Roth, F Henley (Silicon Genesis Corporation), N Cheung (University of California) and C Chan (Northeastern University).....	122
397	Ion-Cut Silicon Layer Transfer with Patterned Implantation of Hydrogen C H Yun, A B Wengrow, N W Cheung (University of California, Berkeley), Y Zheng, R J Welty, Z F Guan, K V Smith, P M Asbeck, E T Yu and S S Lau (University of California, San Diego)	125
398	Improvement of the Stability in the SiC/SOI System by Nitrogen Implantation H Moller (Daimler Benz AG), S Zappe (Technical University of Berlin), V Papaioannoy (Aristotle University of Thessaloniki), G Krotz (Daimler Benz AG), W Skorupa (Institut fur Ionenstrahlphysik), E Obermeier (Technical University of Berlin) and J Stoemenos (Aristotle University of Thessaloniki)	131
399	Preparation of High Quality Silicon on Sapphire Y Moriyasu, T Morishita, M Matsui, A Yasujima (Asahi Chemical Industry Co Ltd) and M Ishida (Toyohashi University of Technology)	137

Part 3: Materials Characterisation and Physical Processes

400	Diffusion and Gettering of 3d Transition Metals (Fe, Cu, Ni) in Silicon-On-Insulator Structures K Korablev (North Carolina State University), O Kononchuk (SHE America Inc), N Yarykin, J Glasko, L Uspenskaya and G Rozgonyi (North Carolina State University)	143
401	Precipitation Kinetics in Buried SiO ₂ Layers: The Role of Spatial Correlations W Skorupa and R Weber (FWIM).....	149
402	Analysis of Ordered Structure of Buried Oxide Layers in SIMOX Wafers T Shimura, R Ejiri, T Hosoi and M Umeno (Osaka University).....	155
403	Electronic Structure Studies of the E prime d and the Triplet-State Centers in a-SiO ₂ S Karna (Air Force Research Laboratory), A Pineda (University of New Mexico), W Shedd and B K Singaraju (Air Force Research Laboratory)	161
404	Properties of Erbium Implanted SIMOX Annealed in Oxygen Ambient J P Zhang (ShanDong Normal University)	167
405	A New Characterisation Process Used to Qualify SOI Films H Moriceau, B Aspar, M Bruel, A M Cartier, C Morales, A Soubie (LETI-CEA), T Barge, S Bressot, C Maleville and A J Auberton (SOITEC)	173

Part 4: Electrical Characterisation and Electronic Properties

406	Direct Determination of Effect of SOI Defects on GOI Characteristics W-H Lee, J-W Lee, H-K Kim, M-R Oh and Y-H Koh (Hyundai Electronics Industries Co).....	179
407	Non-Contact Electrical Characterisation of SOI Surfaces L Lukasiak (Warsaw University of Technology), P Roman, M Brubaker (Penn State University), M Anc (IBIS Technology) and J Ruzyllo (Penn State University)	184

408	A Simple Method to Extract the Oxide Charge Density at the Buried Oxide/Substrate Interface in SOI Capacitor V Sonnenberg (Universidade de Sao Paulo) and J Martino (Universidade de Sao Paulo - LSI/PEE/USP)	189
409	Comparison of Trapped Hole Characteristics in Buried Oxides M Zvanut (University of Alabama at Birmingham) and R Stahlbush (Naval Research Laboratory)	195
410	Extraction of the Oxide Charges at the Buried Oxide/Silicon Substrate Interface in Accumulation-Mode SOI pMOSFETs at Low Temperatures M A Pavanello and J A Martino (Universidade de Sao Paulo)	201
411	A Steady-State Ramp Method for Carrier Lifetime Measurement in the SOI MOSFET Z-Y Cheng and C H Ling (National University of Singapore)	207
412	Hot Carrier Lifetime of SOI CMOS Transistors Fabricated in ADVANTOX W Jenkins (Naval Research Laboratory), S Liu, P Brusius and S Balster (Honeywell Solid State Electronics Center).....	213
413	Characterisation of SOI Thin Film Transistors Fabricated Using SiGe Etch Stop Layers S Uppal (Queen's University of Belfast), D Gay (BCO Technologies Ltd), G A Armstrong, D W McNeill, P Baine, B M Armstrong, H S Gamble (Queen's University of Belfast) and K Yallup (BCO Technologies Ltd)	219
414	Radiation Response in SOI Materials S Liu (Honeywell Solid State Electronics Center), W Jenkins and H Hughes (Naval Research Laboratory)	225
415	Improvement of the Total-Dose Irradiation Hardness in SIMOX Material Implanted by F+ Ions J Gao, C Lin and D Zhu (Chinese Academy of Sciences)	231
416	Performance of Very Thin Film Transistors Fabricated on POLY-SI Crystallized by Combined Solid-State and Laser Annealing M Miyasaka (Seiko Epson Corporation) and J Stoemenos (Aristotle University of Thessaloniki)	237

Part 5: Device Physics

417	Modeling SOI Transistors and Circuits (Invited) S H K Fung (IBM Semiconductor Research and Development Center), M Chan and P K Ko (Hong Kong University of Science and Technology).....	243
418	Simulation of Self Heating Effects in Heterojunction Bipolar Transistors Fabricated in Wafer Bonded SOI Substrates G A Armstrong and H S Gamble (Queen's University Belfast)	249
419	Effect of Buried Oxide on Reliability of Thin-Film SOI nMOSFETs H-K Kim, J-W Lee, W-H Lee, M-R Oh and Y-H Koh (Hyundai Electronics)	255
420	Highly Suppressed Threshold Voltage Roll-off Characteristics of the 4 nm-Thick SOI n-MOSFETs in the 40-135 nm Gate Length Regime E Suzuki, K Ishii, S Kanemaru, T Maeda, T Tsutsumi, K Nagai, T Sekigawa and H Hiroshima (Electrotech Laboratory)	260

421	Short Channel Effects and Subthreshold Operation in Single and Double Gate Deep Submicron SOI MOSFETs E Raully, O Potavin, F Balestra, and C Raynaud ((UMR CNRS/INPG) ENSERG).....	266
422	Interdependence and Significance of Hot Carrier Stress (HCS) and Gate Induced (GIDL) Drain Leakage Current in BC SOI pMOSFETs X Zhao, D Ioannou (George Mason University), W Jenkins, H Hughes (Naval Research Laboratory) and S T Liu (Honeywell SSEC)	272
423	Edge and Floating Body Effects on Hot-Carrier-Induced Degradation in FD SOI n-MOSFETs S H Renn, B Szelag, F Balestra (LPCS(UMR CNRS/INPG)) and C Raynaud (LETI (CEA/CENG))	276
424	Hot-Carrier Degradation Behavior in Thin-Film SOI nMOSFETs With LOCOS and STI J-W Lee, H-K Kim, W-H Lee, M-R Oh and Y-H Koh (Hyundai Electronics Industries Co).....	282
425	Study of the Leakage Drain Current Components in Accumulation-Mode SOI pMOSFETs at High-Temperatures M Bellodi and J A Martino (Escola Politecnica da Universidade de Sao Paulo)	287
426	The Graded-Channel SOI MOSFET to Alleviate the Parasitic Bipolar Effects and Improve the Output Characteristics M A Pavanello, J A Martino (Universidade de Sao Paulo), V Dessard and D Flandre (Universite Catholique de Louvain).....	293
427	Parameter Extraction for Buried Oxide Traps from High-Temperature Kink Effect of Back-Channel SOI IM n-MOSFET A N Nazarov, I P Barchuk, V S L Lysenko (Institute of Semiconductor Physics, NASU) and J P Colinge (University of California, Davis).....	299
428	Direct Observation of Floating Body Effect in SOI MOS FET Using Nuclear Microprobe M Takai, N Nakayama, H Takaoka (Osaka University), T Iwamatsu, Y Yamaguchi, S Maegawa, T Nishimura (Mitsubishi Electric Co), A Kinomura and Y Horino (ONRI)	305

Part 6: Devices Circuits and Applications

429	MTCMOS/SIMOX Circuit Technology for Sub 1-V LSIs (Invited) T Douseki and J Yamada (NTT System Electronics Laboratories).....	311
430	Drain Conductance Degredation in Gate-All-Around Inversion Mode nMOSFETs with Total Dose A Vanooren and J P Colinge (University of California, Davis)	323
431	Ground-Plane Concept for Reduction of Short-Channel Effects in Fully-Depleted SOI Devices T Ernst and S Cristoloveanu (ENSERG).....	329
432	Scalability of Argon Implant for Suppression of Floating Body Effects (Invited) M Mendicino, O Zia, B-W Min, D Chang and X Xu (Motorola Inc)	335
433	SOI Technology for MEMS Applications A Usenko and W Carr (New Jersey Microsystems, Inc).....	347

434	Integrated Optics in UNIBOND for Greater Flexibility T W Ang, P D Hewitt, A Vonsovici, G T Reed (University of Surrey), A G R Evans, P R Routley, T Blackburn and M R Josey (University of Southampton)	353
435	Silicon-On-Sapphire Material and Device Properties at High and Low Temperature D Munteanu, S Cristoloveanu (LPCS/ENSERG), I Lagnado and P de la Houssaye (SPAWAR System Center, San Diego)	361
436	Devices Fabricated on Sub-Micron SOS by Wafer Bonding P Baine, H Gamble, A Armstrong, M Armstrong and N Mitchell	367
	Subject Index	373
