

TABLE OF CONTENTS

ADVANCED FUEL CELLS

Systematic Approach to CO-Tolerant Catalyst Development using Metal Macrocycle Complexes with Platinum R. Venkataraman, H.R. Kunz, and J. Fenton	1
Novel Polymer Electrolytes for Microfabricated Fuel Cells J.S. Wainright, K. Yee, M.H. Litt, Y. Zhang, C.C. Liu, and R.F. Savinell	14
Development of New CO Tolerant Ternary Anode Catalysts for Proton Exchange Membrane Fuel Cells R. Venkataraman, H.R. Kunz, and J.M. Fenton	23
Novel CO-Tolerant Sulfided Platinum Catalysts for PEM Fuel Cells R. Venkataraman, H.R. Kunz, and J.M. Fenton	35
Composite Membranes for Fuel Cell Operation at Higher Temperature J.-C. Lin, J.M. Fenton, H.R. Kunz, and M.B. Cutlip	48
Direct Electrochemical Conversion of Carbon Anode Fuels in Molten Salt Media N. Cherepy, R. Krueger, and J.F. Cooper	64
Miniature Fuel Cells with Non-Planar Interface by Microfabrication S.-J.J. Lee, S.W. Cha, Y. Liu, R. O'Hayre, A. Chang-Chien, and F. Prinz.	67
Non Electrochemical Pathway of Methanol Oxidation at the Oxygen Cathode of a Direct Methanol Fuel Cell W. Vielstich, V. Paganin, F. Lima, and E. Ticianelli	77
Electro-Chemical Evaluation of Direct Methanol Fuel Cells Components for High Temperature Operation A.S. Arico, E. Modica, S. Bellitto, and V. Antonucci	85
Improvement of Polymer Electrolyte Membranes for Polymer Electrolyte and Direct Methanol Fuel Cell Applications L. Qiao, D. Agoumba, and J. Thrasher	92
Performance of a Compact Bipolar Fuel Cell Stack D. Chu, R. Jiang, C. Walker, J. Stephens, R. Jacobs, and K. Gardener	103
Enzymatic Fuel Cell: Biochemical Energy Conversion A. Ranta, X.-C. Zhang, and A. Halme	108

Porous La _{0.6} Sr _{0.4} Co _{0.2} Fe _{0.8} O _{2.8} Electrodes Prepared by in-situ Solid-State Reaction Sintering S. Wang, M. Awano, K. Matsuda, and K. Maeda	118
Effect of Electrode Firing Temperatures on Microstructure and Performance of NiO LSGM LSM Cell Reactors S. Wang, M. Awano, and K. Maeda	123
Catalytic Activities and Polarization Characteristics of LSM and NiO Electrodes Used in Solid Oxide Electrolyte Cell Reactors S. Wang, M. Awano, and K. Maeda	134
Microstructure and Proton-Conducting Properties of Inorganic Nanocomposites Y.-I. Park, M. Nagai, J.-D. Kim, and K. Kobayashi	142
Proton-Conducting Properties of Inorganic-Organic Nanocomposites Y.-I. Park, M. Nagai, J.-D. Kim, and K. Kobayashi	152
A Novel Proton-Conducting ZrP-Based Nanocomposites Y.-I. Park, M. Nagai, J.-D. Kim, and K. Kobayashi	165
A Direct Methanol Fuel Cell Based on a Novel Low-Cost Nanoporous Proton-Conducting Membrane (NP-PCN) E. Peled, T. Duvdevani, A. Aharon, and A. Melman	172
Effect of Solid Acidity of Zeolite on the Ion Conductivity of Zeolite/HSBR Composite Membrane for Direct Methanol Fuel Cells M. Takami, Y. Yamazaki, and H. Hamada	181
The Effect of Anode Metal Loading on CO Tolerance of PEMFC J.-D. Kim, Y.-I. Park, K. Kobayashi, and M. Nagai	190

ADVANCED CAPACITORS

Chemical Synthesis and Characterization of Fluorinated Polyphenylthiophenes for Supercapacitors Application A. Laforgue, P. Simon, and J.-F. Fauvarque	201
Characterization of Nanostructured Hydrous RuO ₂ /Carbon Supercapacitor Electrode Prepared by Colloidal Methods H. Kim, M.-K. Song, R. White, and B. Popov	210
A 24 V Bipolar Electrochemical Double Layer Capacitor Based on Activated Glassy Carbon M. Hahn, M. Baertsch, B. Schnyder, R. Koetz, M. Carlen, C. Ohler and D. Evard . .	220

SEMICONDUCTORS FOR DEVICES

Electrochemical Deposition of Novel Semiconductors for Thermoelectric Microdevices M.A. Ryan, J.A. Herman, J.-P. Fleurial, R.M. Williams, A. Borshchevsky, G.J. Snyder, C.-K. Huang, D. Daly, and T. Caillat	229
Characterization of $Zn_xCd_{(1-x)}Te$ at CdTe/ZnO Interfaces A. Brune and J.B. Wagner, Jr.	235

ADVANCED BATTERIES

A Retrospective on Thin Film Batteries <i>Battery Division Award Address</i> J. Bates	243
Study of Battery State-of Charge Control for HEVs by Means of Vehicle Simulations P.A. Nelson, G.L. Henriksen, and K. Amine	245
As-Deposited Thin-Film Battery Cathode Layers Grown At Room Temperature J. Whitacre, W. West, R. Bugga, E. Brandon, and R. Surampudi	257
Lithium Batteries For Powering Sensor Arrays N. Chong, J. Lim, J. Sakamoto, B. Dunn, M. Kruger, M. Freed, S. Eitapence, K. Poolla, and C. Spanos	266
Direct-Write Microbatteries as Integrated Power Sources for Conformal Electronics K. Swider-Lyons, C. Love, T. Sutto, R. Modi, D. Weir, A. Pique, D. Chrisey	272
Cathodes for the Ambient Temperature Sodium Battery S. Park, P. Kohl, and J. Winnick	277
